PROFILE

Full Stack Developer skilled in Laravel, React, Next.js, Node.js, and React Native, with experience in developing web and mobile applications from concept to deployment. Adept at API development, database management, and UI/UX implementation. Committed to writing efficient code and continuously learning new technologies.

EDUCATION

- 2016-2020
DAFFODIL INTERNATIONAL
UNIVERSITY
- BSc In CSE

WORK EXPERIENCE

- 2024 - PRESENT
Pitor
Full Stack developer
<https://pitor.net/>
 - Developed and maintained scalable web applications using Laravel, React.js, and Node.js, ensuring high performance and responsiveness.
 - Designed and implemented RESTful APIs to enable seamless communication between frontend and backend systems.
 - Built cross-platform mobile applications using React Native, delivering consistent user experience across iOS and Android.
 - Collaborated with UI/UX designers and backend teams to translate business requirements into functional, user-friendly features.
 - Participated in code reviews, debugging, and testing to maintain code quality and minimize production issues.
 - Current Project

 - <https://sushiplanet.net/>

SKILLS

- Git & GitHub
- Postman
- Docker
- Server Management
- Socket , Web RTC
- Database Management

LANGUAGES

- Bangla
- English(basic)

SOFT SKILLS

- Problem-solving
- Time management
- Team Collaboration.

■ 2026 - PRESENT

Interex IT

Full Stack developer

- Designed, developed, and maintained robust RESTful APIs using Laravel and Node.js/Express, serving both web and mobile applications.
 - Architected and optimized database schemas (MySQL/PostgreSQL/MongoDB) for scalability, data integrity, and performance.
 - Implemented authentication and authorization systems (JWT, Laravel Sanctum/Passport) to ensure secure access control.
 - Optimized backend performance through query optimization, caching (Redis), and efficient code structuring, reducing API response time significantly.
 - Wrote and maintained clean, testable code following MVC architecture and best practices (SOLID principles, PSR standards).
 - Managed server deployment and version control using Git, ensuring smooth CI/CD workflows.
